

Litigation Support Services

InfoVision21's Litigation Support Services division offers solutions related to all aspects of Litigation Readiness and Evidence Management. **InfoVision21's** services help customers reduce risk and provide clear visibility into electronic discovery processing and review.

InfoVision21 can assist Law firms, Corporations or Government Agencies in creating a defensible strategy from *Collection* of paper based or Electronically Stored Information (ESI) all the way up to *Trial*. **InfoVision21** can help craft litigation readiness strategy to preserve and retrieve potentially relevant data while protecting privileged information. **InfoVision21** can provide experienced services in managing this data as well as assist in processing, analysis and review. From collection to production, **InfoVision21** can be a critical partner in offering the technology and services required in identifying key documents and data elements. Our cost-effective solutions are designed to reduce the document population considerably for review.

LIST OF SERVICES INCLUDE:

- *Forensic Data Collection*
- *Early Case Assessment*
- *e-Discovery Services*
- *Hosting and Review*
- *Imaging and Indexing/Coding*
- *Data Conversion Services*
- *Software Sales and Training*

InfoVision21 offers these high quality services by combining our best practices with state of the art technology products and tools. Our experienced team consists of Litigation Support Specialists, Data Collection Specialists, Records Management Specialists, and Technology Specialists. All our services adhere to the industry standard Electronic Discovery Reference Model (EDRM).
