InfoVision21, Inc.'s

Service Offerings

SIN 51-501 Needs Assessment and Analysis Services

InfoVision21, Inc. has in depth knowledge to provide an overall assessment of a comprehensive turnkey solution and the ability to clearly define requirements which are linked to strategic goals ensuring high quality, cost-effective solutions. InfoVision21, Inc. has a team of experienced professionals with a combination of legal experience, project management, network and IT support. The Company is well established in each of these areas through both academic training and the real world experience to provide the appropriate strategic guidance and planning required. Team members have trained and consulted with hundreds of people and have applied their knowledge to all aspects of the relevant project areas. In addition, the team has been active in software development both directly and as a beta tester for the products involved.

SIN 51-503 Education and Training

InfoVision21 has professionals with many years of combined experience with all aspects of Summation. The Company's lead trainer has been certified by CTSummation as a trainer and has used, installed and supported the product(s) since 2001. Knowledge of the software is supported by 9 years of litigation practice and 13 years of litigation support management and consulting experience. Other staff members have supported Summation through integration, creation of load files and troubleshooting for the past 6 years. As a service bureau, InfoVision21 has tested and delivered millions of records successfully to clients using Summation. The Company has a large staff of qualified IT personnel to customize, migrate and troubleshoot any issues relating to the technical aspects of the product(s) as well.

Course 1: Introduction to Summation *Course 2: Introduction to Concordance*

SIN 51-504 Record Management Services

InfoVision21 has the combined knowledge of experienced personnel to understand the organization, storage and retrieval of documents. Through business and technology education and decades of experience working with military, Federal and State government document repositories and private industry document populations, InfoVision21 has amassed the knowledge and experience to provide a comprehensive capability to solve the complex challenges posed by the movement, manipulation, archiving, security, and management of records. InfoVision21 provides professional management and administrative support personnel having the necessary skills to perform effective record management services for both classified and/or unclassified records.

File Organization and Maintenance Services provides intellectual and physical support to enable the customer to have control of documents or information. It includes the organization of sophisticated documents or information placing them into a simplified filing system in accordance with a customer's needs to improve their existing work environment. File structure and relationship of documents is essential to understanding the organization of documents. Whether in paper form or electronic, it is essential to know the location, custodian and relationship of documents. Storage goes beyond collecting documents but also requires them to be kept in perspective.

SIN 51-506 Document Conversion Services

InfoVision21 provides professional and nonprofessional document conversion services (DCS) and support enabling customers to more easily organize and manage documents for various reasons. Through InfoVision21's use of reproduction equipment, computer data processing, image management, geographical information systems and other technologies, documents are effectively organized, imaged using state-of-the-art scanning equipment converting the original document's text and graphic image into digital data, which is transferred into new media and formatted to be utilized in a document imaging and storage system to enable rapid location by the personnel of our customers. The key to any successful database project is the proper design of both the software and the database elements that will be utilized by the client. The database design is most successful when it is a true collaboration between the customer and InfoVision21. InfoVision21 treats each project seriously and begin the process with a Project Design Meeting and utilize a Customized Project Binder and Project Tracking Binder, which are custom tailored to fit each customer's specific project needs. These are used in all our processes ensuring established guidelines are maintained and the end result is accurate, useful data. Completing the project on-time and within budget are important factors however, InfoVision21 will never compromise quality for the sake of "being fast". Our rigorous quality control protocols have been developed through practical experience, ensuring the client receives the highest level of accuracy.

SIN 51-508 Litigation Support Services

InfoVision21 provides professional and nonprofessional litigation services and support enabling attorneys and law firm staff members to more easily organize and manage legal documents for presenting evidence and materials for trials, judgments, lawsuits, settlements and other legal matters. Through InfoVision21's use of reproduction equipment, computer data processing, image management, geographical information systems and other technologies, litigation materials are effectively organized to enable rapid location by the personnel of our customers. The types of Support Services InfoVision21 include but are not limited to organizing, copying materials, document preparation, logical document determination, imaging & document conversion, coding & indexing, database development, document analysis, software and systems support. These services can collectively be classified as electronic evidence management. InfoVision21 treats each project seriously and begin the process with a Project Design Meeting and utilize a Customized Project Binder, Project Tracking Binder and a Coding Manual, which are custom tailored to fit each customer's specific project needs. These are used in all our processes ensuring established guidelines are maintained and the end result is accurate, useful data. Completing the project on-time and within budget are important factors however, InfoVision21 will never compromise quality for the sake of "being fast". All projects are provided with appropriate lookup table data so that InfoVision21 customer's benefit from retrieving consistent information such as: names, document types, and informative titles. Our rigorous quality control protocols have been developed through practical experience, ensuring the client receives the highest level of accuracy.

SIN 51-1000 Other Direct Costs

This service offering covers the costs associated with the Special Item Numbers offered under this schedule.

InfoVision21, Inc.'s

Labor Category Descriptions

Job Title: Project Director

Minimum/General Experience: Seven years of progressively more responsible experience in major data oriented or IT projects, including at least 3 years of Project Manager experience or the equivalent. Demonstrates ability to manage multiple complex and time critical support tasks in parallel, including technical/data processing support activities. Requires expert knowledge of the functional area in which support is being provided, and outstanding written and oral communication skills. Must be able to anticipate support needs and develop and execute detailed plans for meeting those needs. Collaborate with entire management staff in developing accurate and effective processes for each of the project requirements.

Functional Responsibility: Responsible for coordinating the activities of several Project Managers, or of managing a single large, complex, mission critical project. Generally reports to a high level manager in the client organization and to a senior corporate officer within InfoVision21. Directs and coordinates all resources assigned to a group of projects, corporate-wide support resources, and possibly subordinate Project Manager staff. Responsible for overall quality assurance and timeliness of all deliverables and support functions.

Minimum Education: Master's degree in IT or management-related field. Master's degree in another field or other graduate degree (e.g., J.D., or Ph.D.) with substantial credits in management-related areas also acceptable. A Bachelor's degree plus 5 years of additional, directly related work experience (over and above the minimum experience).

Job Title: Production Manager

Minimum/General Experience: Five years experience in supervising and coordinating one or more primary tasks. Has complete understanding of the principles, concepts, and practices of assigned tasks. Supervises and trains nonexempt staff. Organized skills including preparing schedules, frequent interaction with team, and monitor output and deliverables. Be instrumental in tracking and measuring task performance.

Functional responsibility: Responsible for document receiving and shipping, document preparation, document number labeling, document photocopying, document coding, and document processing tracking and productivity reporting, except those performed within a Document Center. Also responsible for being the liaison and coordinating activities between document preparation/processing activities and document imaging. Manages all of these tasks for scope of work, schedule, budget, and adherence to accuracy and quality standards. Collaboration with entire management staff in developing accurate and effective processes for each of the project requirements.

Minimum Education: Bachelor's degree. Experience requirements for this position may be substituted for the Master's degree.

Job Title: Production Supervisor

Minimum/General Experience: Minimum Three years experience in supervising one or more primary tasks. Supervises and trains required personnel. Production management skills including preparing schedules, frequent interaction with team, and monitor output and deliverables. Be instrumental in tracking and measuring task performance.

Functional responsibility: Responsible for receiving and shipping data (paper or electronic), shift supervision of document conversion as per specifications, activity monitoring and

reporting. Monitor and Process Electronic Data including exception handling, error monitoring and quality control. Prepare datasets using search criteria where required. Coordinate all activities related to document conversion. between document preparation/processing activities and document imaging. Report to Production Manager or Project Director or customer contact on the shift activities and results.

Minimum Education: Bachelor's degree. High School Diploma with 4 years of experience can be substituted for Degree.

Job Title: Database Specialist

Minimum/General Experience: Five years of experience designing, administering, maintaining, and updating databases.

Functional Responsibility: Administering database standards, controls, and procedures. Provides technical consulting in the definition, design, and creation of a database environment. Develops Data Models, Structured Query Language, Query Optimization, Performance Tuning, Backup and Recovery Procedures etc.. Hosting of data, Access Control, Culling Optimization are also required.

Minimum Education: Bachelor's degree. IT-related certification programs or other technical-related training with 2+ years of additional, directly relevant work experience (over and above the minimum experience requirements for this) may be substituted for the Bachelor's degree.

Job Title: Document Management Analyst

Minimum/General Experience: Three years of experience working on document conversion, Records management or litigation support projects. Ability to work independently and/or in a team environment. Excellent written skills and oral communication skills required. Should be proficient in office applications (MS-Office, Lotus etc...), imaging, networks, data storage media, Should be proficient in databases (MS-Access, Oracle etc...), Structured Query Language, XML and ability to prepare output load files for various industry standard databases and applications.

Functional Responsibility: Performs moderately complex records management and/or litigation support tasks, including, detailed indexing of case files, drafting procedures for accomplishing assignments, and document acquisition related tasks. Proofreads and edits deliverable products. Sometimes serves as "team leader" for larger group of Document Management Technicians and support staff. Proofreads and edits deliverable products. Often works with minimal supervision.

Education: Bachelor's degree.

Job Title: Information Specialist

Minimum/General Experience: Four years of experience in compiling, analyzing, and synthesizing information to support project task requirements. Requires proven knowledge of information resources with clear business analysis experience. Should possess organized and excellent written and oral communications skills. Should be quality oriented and able to work under strict deadlines.

Functional Responsibility: Responds to information requests in specific subject areas and, following established guidelines, gathers, prepares, and summarizes relevant materials for use by other project staff, the customer, or the customer's clients.

Assists with a wide variety of tasks related to identifying, cataloging, storing, maintaining, retrieving, and disseminating information.

Minimum Education: Bachelor's degree. Five years of additional, directly relevant work experience (over and above the minimum experience requirements for this position) may be substituted for the Bachelor's degree.

Job Title: Document Processing Technician

Minimum/General Experience: Two years of experience working with image scanning and conversion equipment. Ability to operate and perform routine tasks, including maintenance of production logs and equipment logs. Attention to detail is important, as is the ability to produce high quality work under sudden deadlines.

Functional Responsibility: Operates digital image processing equipment to capture images, performs OCRing from digital images, burns CDs, creates backup copies of image files, establishes and maintains links between images and database files, converts image files from one medium to another, etc. Performs routine, rudimentary maintenance on equipment. Maintains production logs and equipment maintenance logs. May also be required to extract bibliographic information from documents.

Minimum Education: High school diploma.

Job Title: Data Entry Technician I

Minimum/General Experience: One year of general data entry experience to include experience operating an alphanumeric keyboard. Experience in information technology or automated office environment and in the functional area applicable to specific task orders preferred. Should be able to operate Personal Computers, different peripherals and automation equipment. For specific assignments, may also require ability to analyze documents to extract information. Quality Oriented, attention to detail and ability to work independently while following given procedures required.

Functional Responsibility: Works with data and/or enters data on-line a variety of computer systems. Enters data in prescribed format for subsequent processing. Operate Image Capture Equipment as well as prepare and reassemble the documents. May also extract bibliographic or subjective information from documents, invoices, or other source material and directly input the extracted information onto a data entry screen. Reviews error messages and makes corrections during data entry. Maintains operating records, logs and controls documents, conducts first level quality control checks.

Minimum Education: High school diploma or GED certificate.

Job Title: Data Entry Technician II

Minimum/General Experience: Two years of general data entry experience to include experience operating an alphanumeric keyboard. Experience in information technology or automated office environment and in the functional area applicable to specific task orders preferred. Data Entry Technician II should be able to operate Personal Computers, different peripherals and automation equipment. For specific assignments, may also require ability to analyze documents to extract information. Attention to detail and ability to work independently while following prescribed procedures required.

Functional Responsibility: Works with data and/or enters data on-line to a variety of computer systems. Perform entry of data in predefined format for subsequent processing. May also extract bibliographic or subjective information from documents, invoices, or other source material and directly input the extracted information onto a data entry screen. Reviews error messages and makes corrections during data entry. Maintain required operating records, logs and control documents, conducts first level quality control checks.

Minimum Education: High school diploma or GED certificate.

Job Title: QC Analyst I

Minimum/General Experience: Three years of experience in handling quality control tasks related to document conversion and processing. Experience in information technology or automated office environment and in the functional area applicable to specific task orders preferred. Should be able to operate Personal Computers, different peripherals and automation equipment. Quality Oriented, attention to detail and ability to work independently while following given procedures required.

Functional Responsibility: Works with verification, validation and cleanup of data or images. Performs quality assurance tasks related to imaged output including skewing and enhancements. Performs cleanup tasks related to automated conversion processes including OCR, auto indexing, or auto coding. Verifies the data for highest accuracy as per specifications. Validation and verification of manual indexing data as well as testing the data sets as required. Updates required data logs for tracking error rates and related items.

Minimum Education: High school diploma or GED certificate.

Job Title: QC Analyst II

Minimum/General Experience: Minimum Five years of experience in handling quality control tasks related to document conversion and processing. Perform Global or Project wide quality checks and establish quality procedures and feedback mechanisms. Experience in information technology or automated office environment and in the functional area applicable to specific task orders preferred. Quality Oriented, attention to detail and ability to work independently while following given specifications and project expectations.

Functional Responsibility: Develop and implement clear quality control procedures for document conversion, manual indexing, auto indexing, OCR tasks etc... Works with verification, validation and cleanup of data or images. Performs quality assurance tasks related to imaged output including skewing and enhancements. Train Data Entry technicians / Coders in achieving highest quality as per project specifications. Perform cleanup tasks related to automated conversion processes including OCR, auto indexing, or auto coding. Verifies the data for highest accuracy as per specifications. Validation and verification of manual indexing data as well as testing the data sets as required. Updates required data logs for tracking error rates and related items.

Minimum Education: High school diploma or GED certificate.
